

Develop a Career Portfolio using the Kuder Career Planning System!

This new career planning system offers Garland ISD middle, and high school students the opportunity to assess their interests, skills, and work values through different assessments. Students can begin to build their lifelong portfolio, take assessments, review occupational information, research colleges and access links to additional career development resources from school or from home. This internet-based career planning system allows students to build their personal career plan and explore a variety of career options. Contact your middle school counselor, or the Career and Technical Education counselor for information on how to access this system from school or home.

For questions and links related to Kuder Career Planning System for a high school student, please contact the campus Career and Technical Education Counselor, or the Career and Technical Education department at 972- 487-3168
