High School Course Guide

Information Technology

8D120  Business Computer Information Management I (R)  1 credit  Gr: 9-12

Prerequisite:  None; Recommended Prerequisite: Touch Systems Data Entry – Keyboarding
Description:  In Business Information Management I, students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and make a successful transition to the workforce and postsecondary education. Students apply technical skills to address business applications of emerging technologies, create word-processing documents, develop a spreadsheet, formulate a database, and make an electronic presentation using appropriate software. Students are provided the opportunity to gain OPAC (Office Proficiency Assessment and Certification) and/or MOS (Microsoft Office Specialist) certification for a fee. This course is a prerequisite for the dual credit course, Business Computer Information Management II, through the DCCCD System.

8D125 Business Computer Information Management I (DC)  1 credit  Gr: 11-12

Prerequisite:  None; Recommended Prerequisite: Touch Systems Data Entry – Keyboarding
Description:  In Business Information Management I, students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and make a successful transition to the workforce and postsecondary education. Students apply technical skills to address business applications of emerging technologies, create word-processing documents, develop a spreadsheet, formulate a database, and make an electronic presentation using appropriate software. Students are provided the opportunity to gain OPAC (Office Proficiency Assessment and Certification) and/or MOS (Microsoft Office Specialist) certification for a fee. This course is a prerequisite for the dual credit course, Business Computer Information Management II, through the DCCCD System.

8K900 Computer Maintenance with Lab (R)  2 credits  Gr: 11-12

Prerequisite:  None; Recommended Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course
Description:  In Computer Maintenance, students will acquire knowledge of computer maintenance and creating appropriate documentation. Students will analyze the social responsibility of business and industry regarding the significant issues relating to the environment, ethics, health, safety, and diversity in society and in the workplace as related to computer maintenance. Students will apply technical skills to address the IT industry and emerging technologies.

8K905  Computer Maintenance with Lab (DC)  2 credits  Gr: 11-12

Prerequisite:  None; Recommended Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course
Description:  In Computer Maintenance, students will acquire knowledge of computer maintenance and creating appropriate documentation. Students will analyze the social responsibility of business and industry regarding the significant issues relating to the environment, ethics, health, safety, and diversity in society and in the workplace as related to computer maintenance. Students will apply technical skills to address the IT industry and emerging technologies.

8K950  Computer Programming I  1 credit (Fall)  Gr: 11-12

Prerequisite:  None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course and Algebra I.
Description:  In Computer Programming I, students will acquire knowledge of structured programming techniques and concepts appropriate to developing executable programs and creating appropriate documentation. Students will analyze the social responsibility of business and industry regarding the significant issues relating to the environment, ethics, health, safety, and diversity in society and in the workplace as related to computer programming. Students will apply technical skills to address business applications of emerging technologies. Students will learn software and game development.

NOTE: All courses may not be offered on every campus.
**8K952  Computer Programming II**

**1 credit (Spring)**  
Gr: 11-12  

**Prerequisite:** Computer Programming I; Recommended prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course and Algebra I.  
**Description:** In Computer Programming II, students will expand their knowledge and skills in structured programming techniques and concepts by addressing more complex problems and developing comprehensive programming solutions. Students will analyze the social responsibility of business and industry regarding the significant issues relating to environment, ethics, health, safety, and diversity in society and in the workplace as related to computer programming. Students will apply technical skills to address business applications of emerging technologies.

**8K910  Computer Technician Practicum**

**2 credits**  
Gr: 11-12  

**Prerequisite:** None; Recommended prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course, Business Computer Info. Mgmt. I, Computer Maintenance, Computer Maintenance Lab  
**Description:** In the Computer Technician Practicum, students will gain knowledge and skills in the area of computer technologies, including advanced knowledge of electrical and electronic theory, computer principles, and components related to the installation, diagnosis, service, and repair of computer based technology systems. Students will reinforce, apply, and transfer their knowledge and skills to a variety of settings and problems. Proper use of analytical skills and application of IT concepts and standards are essential to prepare students for success in a technology-driven society. Critical thinking, IT experience, and product development may be conducted in a classroom setting with an instructor, with an industry mentor, or both.

**8K940  Computer Technician Practicum - Cyber Security**

**2 credits**  
Gr: 11-12  

**Prerequisite:** None; Recommended prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course, Principles of Cyber Security, Networking/ Networking Lab  
**Description:** In the Computer Technician Practicum, students will gain knowledge and skills in the area of computer technologies, including advanced knowledge of electrical and electronic theory, computer principles, and components related to the installation, diagnosis, service, and repair of computer based technology systems. Students will reinforce, apply, and transfer their knowledge and skills to a variety of settings and problems. Proper use of analytical skills and application of IT concepts and standards are essential to prepare students for success in a technology-driven society. Critical thinking, IT experience, and product development may be conducted in a classroom setting with an instructor, with an industry mentor, or both.

**8K200  Digital Media (R)**

**1 credit**  
Gr: 9-12  

**Prerequisite:** None; Recommended prerequisite: Touch Systems Data Entry - Keyboarding or BCIM I, or Principles of Information Technology or any Business and Industry Endorsement Principles course  
**Description:** In Digital Media, students will analyze and assess current and emerging technologies, while designing and creating multimedia projects that address customer needs and resolve a problem. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. The knowledge and skills acquired and practiced will enable students to successfully perform and interact in a technology-driven society. Students will enhance reading, writing, computing, communication, and critical thinking and apply them to the IT environment. Examples of software used are Microsoft Office Suite - Word, Excel, PowerPoint, Publisher, as well as Movie Maker, and Adobe Design & Web Premium CS6 Photoshop, Dreamweaver, Illustrator, InDesign, Flash, and Audacity. Adobe Certified Associate (ACA) Certifications are available for a fee.

**NOTE:** All courses may not be offered on every campus.

High School Course Guide

Information Technology

8K715  MST Computer Maintenance for PC’s (DC)  1 credit  Gr: 10-12

MST

Prerequisite: None; Recommended Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course

Description: [MST only at NGHS] Students acquire principles of computer maintenance, including electrical and electronic theory, computer hardware principles, and broad level components related to the installation, diagnosis, service, and repair of computer systems. The student uses troubleshooting skills with hardware knowledge to solve client problems, and applies knowledge of operating system design, including operation and maintenance, to perform information support and service tasks. The student installs and configures software programs and updates information technology systems, and installs, configures, and verifies active network connection.

8K730  MST Internetworking I (CISCO) (H)  1 credit  Gr: 10-12

MST

Prerequisite: None

Description: [MST only at NGHS] The CISCO courses teach students to design, build and maintain computer networks. Licensed by Cisco Systems, Inc., the NGHS Cisco Networking Academy uses Web technologies to prepare students for the 21st century workplace and simultaneously serves as a valuable model for successful e-learning. Laboratory exercises provide opportunity for hands-on experimentation to hone network troubleshooting skills as well as critical-thinking and problem-solving abilities. The Cisco Networking Academy Program qualifies students to pursue a number of industry-standard certifications.

8K735  MST Internetworking I (CISCO) (DC)  1 credit  Gr: 10-12

MST

Prerequisite: None

Description: [MST only at NGHS] The CISCO courses teach students to design, build and maintain computer networks. Licensed by Cisco Systems, Inc., the NGHS Cisco Networking Academy uses Web technologies to prepare students for the 21st century workplace and simultaneously serves as a valuable model for successful e-learning. Laboratory exercises provide opportunity for hands-on experimentation to hone network troubleshooting skills as well as critical-thinking and problem-solving abilities. The Cisco Networking Academy Program qualifies students to pursue a number of industry-standard certifications.

8K740  MST Internetworking II (CISCO) (H)  1 credit  Gr: 11-12

MST

Prerequisite: MST Internetworking I (CISCO)

Description: [MST only at NGHS] The Cisco Networking Academy Program qualifies students to pursue a number of industry-standard certifications, including the Cisco Certified Networking Associate (CCNA), Computing Technology Industry Association (CompTIA) Network+ and Cisco Certified Networking Professional (CCNP) certifications. These initial steps in Cisco Career Certifications culminate with the Cisco Certified Internetworking Expert (CCIE) certification, the industry’s most respected certification for networking professionals. All content in these courses is delivered via the internet. It is strongly recommended that students enrolled in these courses have internet access available at home.

8K745  MST Internetworking II (CISCO) (DC)  1 credit  Gr: 11-12

MST

Prerequisite: MST Internetworking I (CISCO)

Description: [MST only at NGHS] The Cisco Networking Academy Program qualifies students to pursue a number of industry-standard certifications, including the Cisco Certified Networking Associate (CCNA), Computing Technology Industry Association (CompTIA) Network+ and Cisco Certified Networking Professional (CCNP) certifications. These initial steps in Cisco CareerCertifications culminate with the Cisco Certified Internetworking Expert (CCIE) certification, the industry’s most respected certification for networking professionals. All content in these courses is delivered via the internet. It is strongly recommended that students enrolled in these courses have internet access available at home.

NOTE: All courses may not be offered on every campus.
8K730  MST Networking (R)  
**MST**  
**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course  
**Description:** [Math-Science-Technology magnet course offered only at NGHS] In Networking, students will develop knowledge of the concepts and skills related to data networking technologies and practices in order to apply them to personal or career development. To prepare for success, students will have opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.

8K735  MST Networking (R) (DC)  
**MST**  
**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course  
**Description:** [Math-Science-Technology magnet course offered only at NGHS] In Networking, students will develop knowledge of the concepts and skills related to data networking technologies and practices in order to apply them to personal or career development. To prepare for success, students will have opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.

8K700  MST Principles of Information Technology (R)  
**MST**  
**Prerequisite:** None  
**Description:** [Math-Science-Technology magnet course offered only at NGHS] In Principles of Information Technology, students will develop computer literacy skills to adapt to emerging technologies used in the global marketplace. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. Students will enhance reading, writing, computing, communication, and reasoning skills and apply them to the information technology environment.

8K760  MST Research in Information Technology Solutions - PBR (H)  
**MST**  
**Prerequisite:** MST Internetworking II (CISCO)  
**Description:** [Math-Science-Technology magnet course offered only at NGHS] Students gain advanced knowledge and skills in the application, design, production, implementation, maintenance, evaluation, and assessment of products, services, and systems. Knowledge and skills in the proper use of analytical skills and application of information technology concepts and standards are essential to prepare students for success in a technology-driven society.

8K930  Networking (R)  
**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course  
**Description:** In Networking, students will develop knowledge of the concepts and skills related to data networking technologies and practices in order to apply them to personal or career development. To prepare for success, students will have opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.

8K935  Networking (R) (DC)  
**Prerequisite:** None ; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course  
**Description:** In Networking, students will develop knowledge of the concepts and skills related to data networking technologies and practices in order to apply them to personal or career development. To prepare for success, students will have opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.

NOTE: All courses may not be offered on every campus.
8K920  Principles of Cyber Security (R)  1 credit  Gr: 11-12

**Prerequisite:** None; R. Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I

**Description:** This course develops the knowledge and skills needed to master fundamental concepts of cybersecurity. Students in the course will develop a basic foundation for continuing their cybersecurity education and choosing a career in the cybersecurity field.

8K925  Principles of Cyber Security (R)  1 credit  Gr: 11-12

**Prerequisite:**  R. Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I

**Description:** This course develops the knowledge and skills needed to master fundamental concepts of cybersecurity. Students in the course will develop a basic foundation for continuing their cybersecurity education and choosing a career in the cybersecurity field.

8K100  Principles of Information Technology (R)  1 credit  Gr: 9-10

**Prerequisite:** None

**Description:** In Principles of Information Technology, students will develop computer literacy skills to adapt to emerging technologies used in the global marketplace. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. Students will enhance reading, writing, computing, communication, and reasoning skills and apply them to the information technology environment.

8K960  Practicum in Information Technology - Programming  2 credits  Gr: 11-12

**Prerequisite:** A minimum of two high school information technology (IT) courses (Computer Programming II)

**Description:** In the Practicum in Information Technology - Programming, students will gain advanced knowledge and skills in the application, design, production, implementation, maintenance, evaluation, and assessment of products, services, and systems. Knowledge and skills in the proper use of analytical skills and application of IT concepts and standards are essential to prepare students for success in a technology-driven society. Critical thinking, IT experience, and product development may be conducted in a classroom setting with an industry mentor, as an unpaid or paid internship, as part of a capstone project, or as career preparation. A key focus for this course is on the software and game development industry.

8K980  Practicum in Information Technology - Web Design  2 credits  Gr: 11-12

**Prerequisite:** A minimum of two high school information technology (IT) courses (Web Technologies)

**Description:** In the Practicum in Information Technology - Programming, students will gain advanced knowledge and skills in the application, design, production, implementation, maintenance, evaluation, and assessment of products, services, and systems. Knowledge and skills in the proper use of analytical skills and application of IT concepts and standards are essential to prepare students for success in a technology-driven society. Critical thinking, IT experience, and product development may be conducted in a classroom setting with an industry mentor, as an unpaid or paid internship, as part of a capstone project, or as career preparation. A key focus for this course is on web design.

8C110  Professional Communication (R)  0.5 credit  Gr: 9-12

**Prerequisite:** None

**Description:** Professional Communications blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Within this context, students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research.

NOTE: All courses may not be offered on every campus.
8K400  Raster-Based Geographical Information Technology (R)  1 credit  Gr: 11-12

**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I

**Description:** [SHS only] Students will study local problems and acquire information including images or aerial photographs, process the data and merge it with vector data. Students will plan, conduct and present solutions for locally based problems while working with the private sector, business and local government.

8K405  Raster-Based Geographical Information Technology (DC)  1 credit  Gr: 11-12

D

**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I

**Description:** [SHS only] Students will study local problems and acquire information including images or aerial photographs, process the data and merge it with vector data. Students will plan, conduct and present solutions for locally based problems while working with the private sector, business and local government.

8K210  Spatial Technology and Remote Sensing (R)  1 credit  Gr: 10-12

**Prerequisite:** None; Recommended Prerequisites: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I

**Description:** [SHS only]. This course provides students with instruction in Geographic Information Systems (GIS) and Remote Sensing (RS) technology. Students will participate in applied learning activities with emphasis placed on planning, conducting and presenting special projects dealing with the GIS/RS tools and data.

8D110  Touch System Data Entry - Keyboarding (R)  0.5 credit  Gr: 9-12

**Prerequisite:** None

**Description:** In Touch System Data Entry, students apply technical skills to address business applications of emerging technologies. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students will need to apply touch system data entry for production of business documents.

8D115  Touch System Data Entry - Keyboarding (DC)  0.5 credit  Gr: 11-12

D

**Prerequisite:** None

**Description:** In Touch System Data Entry, students apply technical skills to address business applications of emerging technologies. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students will need to apply touch system data entry for production of business documents.

8K970  Web Technologies (R) (Spring)  1 credit  Gr: 9-12

**Prerequisite:** None; Recommended Prerequisite: Principles of Information Technology or any Business and Industry Endorsement Principles course and Business Computer Information Management I and/or Digital Media

**Description:** In Web Technologies, students will learn to make informed decisions and apply the decisions to the field of IT. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. The knowledge and skills acquired and practiced will enable students to successfully perform and interact in a technology-driven society. Students will enhance reading, writing, computing, communication, and critical thinking and apply them to the IT environment. Students will focus on designing and creating for the World Wide Web.

NOTE: All courses may not be offered on every campus.
